5002p2ZWTLN:ref ]

Dear Nagyvárad,

Thank you for your message.  
All obsolete transponders can be traded in for the discount.  
The RC4 series cannot be traded in.

We do ask to be honest in returning the transponders, they should normally be functional transponders, but we naturally cannot check the MRT or clones.  
However, as you will be buying back other transponders for that we do make sure to get the Clone and MRT off the market, which is our intention.

As mentioned the maximum is 44.5% but only if you buyback RC4 Pure.  
The other trade in conditions are:

*DECODER trade in:*  
RC2 or older decoder trade in for RC4 decoder (firmware 4.5):  
EUR 2.299,- **-/- 53.5% trade in discount**

*TRANSPONDER trade in:*  
RC3, MRT or clone transponder trade in for RC4 HYBRID:  
EUR 98.35 **-/- 24.4% trade in discount**

RC3, MRT or clone transponder trade in for RC4 PURE:  
EUR 74.37 **-/- 44.5% trade in discount**

RC3, MRT or clone transponder trade in for RC4 PRO:  
EUR 81.82 **-/- 19.2% trade in discount**

All prices Excl. VAT and discount only applicable after receiving the transponders back.

I can make you an offer if you want for trading in transponders. If so, can you let me know how many transponders you would return? Then I can make you an offer.

Otherwise it will be a normal Offer for 15x RXC4 Hybrid @ EUR 98.35 excl. VAT.

With kind regards, Met vriendelijke groet, Meilleures salutations  
Mark Feenstra
